WELCOME MESSAGES

IUGA PRESIDENT

Dear colleagues and friends,

It is with great pleasure that I welcome you to Vancouver, Canada to celebrate the 42nd Annual Meeting of the International Urogynecological Association.

This will undoubtedly be the premier urogynecological meeting of the year. In order to meet this goal, the program committee along with the help of the local organizing committee has structured a unique blend of stimulating science and varied social activities.

Our host, Geoff Cundiff (Local Organizing Committee Chair), along with his colleagues and the IUGA Program Committee led by Roy Ng, have included over 25 workshops, 10 mini state of the art lectures, 5 special lectures, and a surgery session. The IUGA Scientific Committee led by Fred Milani selected the best and most interesting abstracts from the hundreds submitted in order to formulate very enticing and stimulating scientific sessions.

The meeting is timely for all our members including surgeons, physical- and physio-therapists and specialist nurses. For example we are keenly aware of the recent controversies in the surgical management of incontinence and pelvic organ prolapse and the increase in pelvic floor trauma resulting from childbirth. Much of the data to be presented will provide updates as well as guidance for patient care.

Vancouver is a great tourism destination, there will be plenty for you and accompanying persons to do and see and I encourage you to spend a few extra days to appreciate the all that Vancouver has to offer.

Thank you all for joining us in Vancouver for the 42nd Annual Meeting; like last year it should be excellent.

Warmest Regards,

LYNSEY HAYWARD
IUGA PRESIDENT
LOCAL CHAIR

The 42nd Annual Meeting of the International Urogynecological Association takes place on June 21-24th in Vancouver, British Columbia, Canada.

Your flight landed at Vancouver Airport, recently named the best airport in the world. A short train or taxi ride delivered you to the heart of our dynamic city and Vancouver Convention Centre. The award winning Vancouver Convention Centre is nestled beside Coal Harbour with views of the beautiful North Shore Mountains. Vancouver is Canada’s Pacific gem, a clean safe, and vibrant cosmopolitan city. Downtown Vancouver is a dynamic walking community. Nearby is Stanley Park, the largest metropolitan park after Central Park in New York city. And you will want to be out of doors given the temperate climate and 18 hour long days to enjoy it.

The meeting itself will provide the clinical and academic content that you have come to expect from IUGA. There will be a wide offering of workshops on timely topics to enhance your practice. A special surgical session in cadavers will offer surgical pearls on multiple approaches to repairing apical prolapse. Meet the experts for breakfast before the meeting. The latest scientific research will be interspersed with focused state of the art lectures. And we will feature panel discussions on preventing birth trauma and on the microbiome in pelvic floor medicine. There will also be a debate of estrogen versus laser therapy for genital atrophy syndrome and keynote lectures on mesh in prolapse surgery and the management of pelvic pain.

You will be torn between the offerings at the meeting and the desire to explore. Of course there will be plenty of opportunities to see Vancouver through the social events. Alternatively, plan a few extra days to visit the Sunshine Coast, Whistler, or Victoria, which are all a short drive or ferry away. Or if you prefer take a floatplane to these destinations from right outside your hotel in Coal Harbour. There are also opportunities for whale watching, golf, kayaking, hiking, and mountain biking.

Thanks for joining us in Vancouver!

ABOUT IUGA

The International Urogynecological Association (IUGA) is a not-for-profit international professional medical organization with a defined mission, to “advance urogynecological knowledge around the world”. It was founded in 1975 and Axel Ingelman-Sundberg, as its first President, began a tradition of scientific integrity in the study of urogynecology that IUGA, with its rapidly growing membership, has continued to foster. The international base of the society includes representation from 70 countries, which allows for the prompt dissemination of new ideas throughout the world. New 90+ educational programs have included the IUGA eXchange, which has enabled experienced urogynecologists to share knowledge in countries and regions where there is little clinical expertise in the care of female pelvic floor disorders, and IUGA Regional Symposia designed as technical sessions held in regions of the world where Urogynecology is already represented. The organization has recently grown to nearly 3,000 members whose enthusiastic participation in IUGA Committees has contributed to the production of important IUGA sponsored documents.

Introduction of the attending members

Discussions - Main goals for the group and priority of the activites

The International Consensus on Peripartum Perineal Care Communication with relevant associations.

There are many groups and associations managing women's health, and we should establish contact with these; FIGO, WHO, IUGA, ICM, RCOG, RCM, ACOG?

Create/develop and publish a suggestion for a standardization, recommendation or a guideline.

Many guidelines already exist, most national associations have one. In stead of a new guideline, an expert statement based on existing evidence was suggested. We suggest President Freeman to contact FIGO - Intra- and postpartum care.

WORKSHOPS - MORNING

08:00 a.m. - 12:00 p.m.
WS#1 – Hands-On Workshop on Diagnosis and Repair of 3rd / 4th Degree Obstetric Tears
Location: East Meeting Room 3
Co-Chairs: Abdul Sultan (United Kingdom) & Ranee Thakar (United Kingdom)

Hand-On
Faculty: Aswini Balachandran (United Kingdom) & Farah Lone (United Kingdom)

At the conclusion of this workshop, the participant will be able to:
» Understand the anatomy and physiology of the anal sphincter
» Learn how to identify, repair and manage primary obstetric anal sphincter injuries (OASIS)
» Learn the technique and interpretation of endoanal ultrasound

08:00 a.m. - 12:00 p.m.
WS#2 – Laparoscopic Sacrocolpopexy: Hands-on Training by the Experts
Location: East Meeting Room 12
Co-Chairs: Stephen Jeffery (South Africa) & Robert Moore (USA)

Hand-On
Faculty: Geoffrey Cundiff (Canada), Bruno Deval (France), John Miklos (USA) & Christian Phillips (United Kingdom)

At the conclusion of this workshop, the participant will be able to:
» Understand surgical anatomy of laparoscopic sacrocolpopexy to enhance a safe technique and avoid complications
» Have a detailed knowledge of the technique as detailed by the expert faculty
» Learn how to complete LSC safely and efficiently.

08:00 a.m. - 12:00 p.m.
WS#3 – Perineal Trauma: Prevention, Evaluation, Education and Repair of Obstetric Perineal Trauma
Location: East Meeting Room 9
Co-Chairs: Vladimir Kalis (Czech Republic) & Katariina Laine (Norway)

Hands-On
Faculty: Jan Willem de Leeuw (The Netherlands) & Renaud de Tayrac (France)

At the conclusion of this workshop, the participant will be able to:
» Execute manual perineal protection effectively
» Know whether or not to perform episiotomy and which way
» Perform transperineal ultrasound and diagnose anal sphincter and its trauma

08:00 a.m. - 12:00 p.m.
WS#4 – Abdominal and Pelvic Pain Syndromes: Will we ever find a solution?
Location: East Meeting Room 13
Co-Chairs: Vani Dandolu (USA), Alex Digesu (United Kingdom) & Keng Jin Ng (United Kingdom)
Interactive Seminar
Faculty: Maura Seleme (Brazil)

At the conclusion of this workshop, the participant will be able to:
» Understand the concept of pain mechanisms
» Comprehend the classification of pain syndromes
» Evaluate the evidence for chronic pain therapies

08:00 a.m. - 12:00 p.m.
WS#5 – Comprehensive Pelvic Floor Ultrasonography: Transperineal, Endovaginal, Endoanal Imaging
Location: East Meeting Room 1
Chair: S. Abbas Shobeiri (USA)

Hands-On
Faculty: Aparna Hegde (India), Lieschen H. Quiroz (USA) & Andrea C. Santiago (Philippines)
At the conclusion of this workshop, the participant will be able to:

- Understand how to perform 2D transperineal, 3D endovaginal and 3D endoanal ultrasound
- Understand how to interpret 2D transperineal, 3D endovaginal and 3D endoanal ultrasound
- Understand how to use the desktop 3D software to obtain basic measurements

08:00 a.m. - 12:00 p.m.

**WS#6 – Cosmetic Gynecology for The Urogynecologist**

Location: East Meeting Room 8

Co-Chairs: Robert Moore (USA) & Jack Pardo (Chile)

**Interactive Seminar**

Faculty: Oscar Aguirre (USA), Adrian Gaspar (Argentina) & John Miklos (USA)

At the conclusion of this workshop, the participant will be able to:

- Understand the importance of Cosmetic Gynecology in a modern urogynecological practice
- Learn different procedures and surgeries in cosmetic surgery
- Combine a surgical cosmetic procedure in a urogynecological surgery.

08:00 a.m. - 12:00 p.m.

**WS#7 – Recent Advances in Regenerative Medicine in Pelvic Floor**

Location: East Meeting Room 15

Chair: Harold Drutz (Canada)

**Interactive Seminar**

Faculty: May Alarab (Canada), Margot Damaser (USA), Mark Kibschull (Canada) & Oksana Shynlova (Canada)

At the conclusion of this workshop, the participant will be able to:

- Share a current view on molecular mechanisms of Pelvic Organ Prolapse development
- Expand their knowledge about stem cell properties, methods of isolation/propagation, and potentially their worldwide applications in the areas of urogynecology.

08:00 a.m. - 12:00 p.m.

**WS#8 – Interactive Workshop on Complications in Urogynaecological Surgery- Practical and Training Perspectives**

Location: East Meeting Room 16

Co-Chairs: Peter Dwyer (Australia) & Anna Rosamilia (Australia)

**Interactive Seminar**

Faculty: Alison De Souza (Australia), Yik Lim (Australia) & Lore Schierlitz (Australia)

At the conclusion of this workshop, the participant will be able to:

- Understand the anatomical principles for pelvic floor surgery and its complications
- Learn how to develop safer techniques in pelvic floor surgery
- Learn practical aspects of managing surgical complications

08:00 a.m. - 12:00 p.m.

**WS#9 – Advanced Urodynamic Assessment**

Location: East Meeting Room 17

Chair: Swati Jha (United Kingdom)

**Interactive Seminar**

Faculty: Dudley Robinson (United Kingdom) & Philip Tooze-Hobson (United Kingdom)

At the conclusion of this workshop, the participant will be able to:

- Understand the principles and physics of urodynamics assessment, and the terminology used in this field.
- Learn how to write an urodynamics report and some of the pitfalls of interpretation (artefacts).
- Understand techniques through case-based discussions

- Learn the existing animal models to examine the effectiveness of SCs for treatment of SUI and POP
08:00 a.m. - 12:00 p.m.
WS#10 – Accidental Bowel Leakage: From Delivery Room to the Nursing Home, a Case-Based Treatment Guide
Location: East Meeting Room 11
Chair: Catherine Matthews (USA)

Interactive Seminar
Faculty: Kimberly Kenton (USA) & Tristi Muir (USA)

At the conclusion of this workshop, the participant will be able to:
» Identify common risk factors for accidental bowel leakage
» Demonstrate familiarity with an evidence-based algorithm for fecal incontinence management
» Appropriately manage complications of obstetric anal sphincter laceration repair

08:00 a.m. - 12:00 p.m.
WS#11 – Optimising Outcomes from Surgical Management of the Older Patient with Frailty/Multimorbidity
Location: East Meeting Room 19
Chair: Adrian Wagg (Canada)

Interactive Seminar
Faculty: William Gibson (Canada) & Kathleen Hunter (Canada)

At the conclusion of this workshop, the participant will be able to:
» Identify and screen for physical and cognitive frailty in older persons
» Identify co-existing conditions which might be amenable to pre-operative intervention to achieve best outcomes following surgical treatments for lower urinary tract and pelvic floor dysfunction in frail older women
» Identify and implement post-operative interventions designed to improve outcomes from surgical intervention for lower urinary tract and pelvic floor dysfunction in women

08:00 a.m. - 12:00 p.m.
WS#12 – Surgical Anatomy of the Female Pelvis & How it Relates to Pelvic Reconstructive Surgery
Location: East Meeting Room 18
Co-Chairs: Thomas Aigmueller (Austria) & Wolfgang Umek (Austria)

Hands-On
Faculty: Engelbert Hanzal (Austria), Marianne Koch (Austria) & Daniela Ulrich (Austria)

At the conclusion of this workshop, the participant will be able to:
» Understand the topographic anatomy of the female pelvis
» Identify specific landmarks for vaginal reconstructive pelvic floor surgery
» Apply the anatomic knowledge to vaginal surgical procedures like vaginal hysterectomy, colporrhaphy, sacrospinous ligament fixation, culdoplasty, high-uterosacral-ligament-fixation

08:00 a.m. - 12:00 p.m.
WS#13 – Interdisciplinary Treatment of Pelvic Floor Muscle Spasm Pain: A Medical and Physical Therapy Perspective
Location: East Meeting Room 2
Chair: Carina Siracusa (USA)

Interactive Seminar
Faculty: Roxana Geoffrion (Canada)

At the conclusion of this workshop, the participant will be able to:
» Learn the pelvic examination for pain from a pelvic physio perspective
» Understand simple activities, stretching exercises, and lifestyle recommendations that may benefit the patient with pelvic pain
» Understand medical therapies for pelvic floor muscle spasm
WORKSHOPS - AFTERNOON

01:00 p.m. - 03:00 p.m.
WS#24 – Practical Aspects of Managing and Preventing Urinary Tract Infections
📍 Location: East Meeting Room 16
👤 Chair: Kevin Carlson (Canada)

**Interactive Seminar**
📜 Faculty: Richard Baverstock (Canada), Duane Hickling (Canada) & Blayne Welk (Canada)

**At the conclusion of this workshop, the participant will be able to:**
» Develop an evidence- and best practice-based approach to the prevention of UTI’s in pre-menopausal women.
» Appropriately diagnose and treat UTI’s in select challenging patients.
» Develop strategies for the management and prevention of catheter-associated UTI’s.

01:00 p.m. - 03:00 p.m.
WS#25 – Interdisciplinary Management of Women with Provoked Vestibulodynia
📍 Location: East Meeting Room 17
👤 Chair: Claudia Brown (Canada)

**Interactive Seminar**
📜 Faculty: Rami Nijar (Canada), Marie-Josée Lord (Canada) & Leslie Sadownik (Canada)

**At the conclusion of this workshop, the participant will be able to:**
» Define provoked vestibulodynia and identify the presentation and symptomatology inherent in this common form of dyspareunia.
» Understand the medical, psychological and physiotherapeutic aspects of a comprehensive biopsychosocial approach to provoked vestibulodynia.
» Recognize the value of the interdisciplinary approach in the management of genito-pelvic pain/penetration disorders.

01:00 p.m. - 03:00 p.m.
WS#26 – To Mesh or ot to Mesh: Vaginal Surgery for Apical Prolapse
📍 Location: East Meeting Room 19
👤 Co-Chairs: Roxana Geoffrion (Canada) & Maryse Larouche (Canada)

**Interactive Seminar**

**At the conclusion of this workshop, the participant will be able to:**
» Understand evidence behind vaginal mesh kits and self-tailored mesh currently in use for the treatment of apical prolapse.
» Understand vaginal surgical reconstructive approaches using sutures for the treatment of apical prolapse.
» Understand the role of various surgeries in cases of recurrent pelvic apical prolapse.

01:00 p.m. - 05:00 p.m.
WS#14 – Laparoscopic Sacrocolpopexy: Hands-on Training by the Experts
📍 Location: East Meeting Room 12
👤 Co-Chairs: Stephen Jeffery (South Africa) & Robert Moore (USA)

**Hands-On**
📜 Faculty: Geoffrey Cundiff (Canada), Bruno Deval (France), John Miklos (USA) & Christian Phillips (United Kingdom)

**At the conclusion of this workshop, the participant will be able to:**
» Understand surgical anatomy of laparoscopic sacrocolpopexy to enhance a safe technique and avoid complications.
» Have a detailed knowledge of the technique as detailed by the expert faculty.
» Learn understand how to complete LSC safely and efficiently.
01:00 p.m. - 05:00 p.m.

**WS#15 – Educational Clay Workshop for Pelvic Anatomy**

Location: East Meeting Room 9
Chair: Deborah Myers (USA)

**Hands-On**

Faculty: Vivian Aguilar (USA), Oliver Daly (Australia), Holly Richter (USA), Rebecca Rogers (USA), Vivian Sung (USA) & Blair Washington (USA)

At the conclusion of this workshop, the participant will be able to:

» Describe the bony landmarks and musculature of pelvis
» Describe the pertinent ligaments of the pelvis used in reconstructive surgery
» Describe the path and function of the sciatic, obturator, and pudendal nerve

01:00 p.m. - 05:00 p.m.

**WS#16 – The Overactive Pelvic Floor**

Location: East Meeting Room 13
Chair: Anna Padoa (Israel)

**Interactive Seminar**

Faculty: Debbie Cohen (USA), Linda McLean (Canada), Amy Stein (USA) & Carolyn Vandyken (Canada)

At the conclusion of this workshop, the participant will be able to:

» Understand the definition, etiology and pathophysiology of non-relaxing pelvic floor muscle tone
» Manage evaluation of patients with OPF with a multidisciplinary approach
» Plan a treatment strategy for pelvic floor overactivity and common related urogynecologic conditions

01:00 p.m. - 05:00 p.m.

**WS#17 – Pelvic Floor Ultrasound Imaging**

Location: East Meeting Room 1
Co-Chairs: Hans Peter Dietz (Australia) & Ka Lai Shek (Australia)

**Interactive Seminar**

Faculty: Kamil Svabik (Czech Republic) & Vivien Wong (Australia)

At the conclusion of this workshop, the participant will be able to:

» Understand the basic methodology and clinical uses of pelvic floor ultrasound imaging, both 2D and 3D/4D ultrasound technology
» Assess pelvic floor trauma, in particular levator ani trauma and anal sphincter tears
» Use ultrasound imaging in the investigation and treatment of pelvic organ prolapse

01:00 p.m. - 05:00 p.m.

**WS#18 – Innovative Pelvic Floor Rehabilitation: ‘Peripartum women knocking’ the Door-to-Door concept**

Location: East Meeting Room 2
Chair: Bary Berghmans (The Netherlands)

**Interactive Seminar**

Faculty: Alex Digesu (United Kingdom), Hege Holmo Johannessen (Norway), Barry O’Reilly (Ireland), Maura Seleme (Brazil) & Steven Swift (USA)

At the conclusion of this workshop, the participant will be able to:

» Understand the significance and structure of the different health care providers’ (medical doctors, pelvic physiotherapists, midwives) assessment like history-taking, exam, classification, analysis & evaluation of the pelvic floor in antenatal and post-partum women
» Discuss and understand the level of evidence for the need of prevention and treatment of pelvic floor dysfunctions in peripartum women
» Discuss and understand the influence of vaginal delivery on development of pelvic floor dysfunctions in peripartum women
01:00 p.m. - 05:00 p.m.

**WS#19 – Vaginal Laser Applications in Urogynecology**
- **Location:** East Meeting Room 8
- **Chair:** Menachem Alcalay (Israel)

**Interactive Seminar**
- **Faculty:** Ivan Fistonic (Croatia), Stefano Salvatore (Italy) & Giuseppe Scibilia (Italy)

*At the conclusion of this workshop, the participant will be able to:*
- Understand the physics and biology of vaginal laser applications
- Understand the possible clinical indications for vaginal laser treatments
- Understand different protocol regimes and the needed future research

01:00 p.m. - 05:00 p.m.

**WS#20 – Research & Development: A Workshop for Early Career Researchers**
- **Location:** East Meeting Room 6
- **Chair:** Kaven Baessler (Germany)

**Interactive Seminar**
- **Faculty:** Wael Agur (United Kingdom), Tony Bazi (Lebanon), Debjyoti Karmakar (Australia) & Veronica Mallett (USA)

*At the conclusion of this workshop, the participant will be able to:*
- Develop an appropriate study design for a research question
- Select relevant and appropriate outcome measures
- Perform a sample size estimation and appropriate statistical tests

01:00 p.m. - 05:00 p.m.

**WS#21 – Complications of SUI and POP Surgery: Prevention and Management—A Review from Both Urology and Gynecology**
- **Location:** East Meeting Room 11
- **Chair:** Howard Goldman (USA)

**Interactive Seminar**
- **Faculty:** Catherine Matthews (USA), Javier Pizarro Berdichevsky (Chile) & Sandip Vasavada (USA)

*At the conclusion of this workshop, the participant will be able to:*
- Summarize the symptoms and presenting scenarios for common and uncommon complications of urinary incontinence and pelvic prolapse surgery
- Describe the appropriate work-up and evaluation of these complications
- Delineate and describe the appropriate choices for intervention for these complications

01:00 p.m. - 05:00 p.m.

**WS#22 – The Management of Refractory OAB**
- **Location:** East Meeting Room 18
- **Chair:** Linda Cardozo (United Kingdom)

**Interactive Seminar**
- **Faculty:** Alex Digesu (United Kingdom), Howard Goldman (USA), Angela Rantell (United Kingdom), Dudley Robinson (United Kingdom), Stefano Salvatore (Italy), Philip Toozs-Hobson (United Kingdom) & Ian Tucker (Australia)

01:00 p.m. - 05:00 p.m.

**WS#31 - Hands on Urodynamic Course**
- **Location:** East Meeting Room 15
- **Chair:** Timothy McKinney (USA)

**Hands-On**
- **Faculty:** G. Willy Davila (USA), Mikel Gray (USA), Peter Sand (USA) & Lynn Stothers (Canada)

*At the conclusion of this workshop, the participant will be able to:*
- Perform a thorough and quality urodynamic test
- Read and interpret the urodynamic tracing
- Trouble shoot problems commonly encountered during urodynamics
01:00 p.m. - 05:00 p.m.
**PROTECT – Train the Trainer Program**
Prerequisites are required to attend / Registration is closed
Location: East Meeting Room 3
Co-Chairs: Abdul Sultan (United Kingdom) & Ranee Thakar (United Kingdom)
Faculty: Jan Willem de Leeuw (The Netherlands) & Farah Lone (United Kingdom)

03:30 p.m. - 05:30 p.m.
**WS#27 – Vaginal Pessaries: Modern Re-Emergence for Pelvic Organ Prolapse and Urinary Incontinence**
Location: East Meeting Room 14
Co-Chairs: Magali Robert (Canada) & Grace Neustaedter (Canada)
Interactive Seminar
Faculty: Christine Johnson (Canada)

At the conclusion of this workshop, the participant will be able to:
» Understand how pessaries can be used to effectively treat pelvic organ prolapse (POP) and types of urinary incontinence (UI).
» Assess and fit women with pessaries and manage the follow up including arising common problems.
» Address more common issues pertaining to pessary use and organization of practice

03:30 p.m. - 05:30 p.m.
**WS#29 – Vaginal Apical Support Procedures (Native Tissue) -Surgical Technique**
Location: East Meeting Room 16
Co-Chairs: Geoffrey Cundiff (Canada) & David Quinlan (Canada)
Interactive Seminar
Faculty: Mark Slack (United Kingdom) & Kobus van Rensburg (South Africa)

At the conclusion of this workshop, the participant will be able to:
» Understand surgical options and outcome of vaginal apical support procedures
» Understand surgical anatomy and techniques of vaginal apical support procedures
» Recognize and manage surgical complications

03:30 p.m. - 05:30 p.m.
**WS#30 – Better Results of Anti-incontinence Surgery – How to use Introital Pelvic Floor Ultrasound Transvaginal Probe**
Location: East Meeting Room 17
Chair: Grzegorz Surkont (Poland)
Interactive Seminar
Faculty: Andrzej Kuszka (Germany)

At the conclusion of this workshop, the participant will be able to:
» Optimize selection of patient and anti-incontinence procedures
» Improve surgical techniques
» Practice adequate management of perioperative problems

**EVENING**

05:30 p.m. - 07:30 p.m.
**Welcome Reception**
Location: East Exhibition Hall B
